

Duo Foam Support Air Alternating Mattress, Single (Low/High Risk)

Price: \$85.00 per week

Call us at 1300 85 45 15 to order

The Foam Air Alternating Mattress helps relieve and treat pressure ulcers through the use sets of air cells being alternatively inflated. It functions as a static pressure

relieving surface without the control unit. When clinically required, it can step up to provide dynamic therapy with the control unit connected. The compact control unit is easily connected for immediate support, with no disruption to patient comfort. It combines a durable foam core with alternating air cells embedded with castellated foam to deliver comfort and support for patients up to 230 kg.

This Hybrid Alternating Air Pressure Mattress is available for Hire in Melbourne.

Features and Benefits Adaptive Pressure Relief: Switch effortlessly between static and dynamic modes using the integrated control unit. The dynamic 1:2 cell alternation optimizes pressure distribution.

Easy to Use: Simple "plug-and-play" design requires minimal training, ensuring quick and efficient operation.

Long-lasting Comfort: Combines a sturdy foam base with alternating air cells and castellated foam for a perfect blend of durability and comfort.

Simple Maintenance: All parts are designed for easy cleaning. The machine-washable top cover promotes better hygiene and infection control.

Smart Weight Adjustment: Features AutoCair technology, which automatically senses and adjusts pressure settings based on the user's weight, maintaining safe and effective therapy levels.

Tailored for Elderly Care: Specially designed to meet the unique needs of community and aged care environments, providing reliable support and pressure relief.

Safe and Hygienic Materials: The top cover is latex-free and can withstand high-temperature cleaning up to 95°C, ensuring thorough sanitization and user safety.
