iCare Gravitate G6 Floorline Bed – Ultimate Comfort & Fall Prevention

The Icare Gravitate G6 Floorline Adjustable Bed is designed to provide exceptional

comfort and safety, making it ideal for homecare and aged care environments. With essential positioning functions, including head lift, knee break, height adjustment, and Trendelenburg positioning, it ensures optimal support for users with varying mobility needs.

A key feature of the G6 is its ultra-low height, which allows the bed to be lowered to ground level, minimizing fall risks and enhancing user safety. For added convenience and protection, the Soft Touch Option provides a gentle, cushioned surface on the headboard, footboard, and optional split side rails, improving both comfort and aesthetics.

Built with durability and ease of use in mind, the Gravitare G6 includes a collapsible design, making it perfect for smaller rooms or spaces with limited maneuverability. The bed supports a safe working load of 220kg, ensuring stability and strength for a wide range of users.

Key features:

- Auto-regression backrest for improved pressure relief.
- Emergency battery back-up to maintain functionality during power outages.
- Backlit, wipeable hand control with full or semi lock-out modes for effortless adjustments.
- Exit sensing underbed lighting, enhancing nighttime safety.

The Gravitare G6 Floorline Bed combines functionality, safety, and modern aesthetics, making it the ideal choice for those seeking superior comfort and care in a reliable, thoughtfully designed bed.
